PROJECT

Farm Guru
Farm Guru is an online instructor platform that empowers farmers with expert knowledge and guidance to enhance their farming practices and successfully cultivate exotic fruit varieties. Through interactive tutorials and resources, Farm Guru helps farmers optimize their yields, improve crop quality, and tap into new market opportunities."

Face Recognition and Attendance System
The Face Recognition and Attendance System is an innovative project that leverages AI-powered facial recognition technology to accurately identify and verify individuals, automating attendance tracking and eliminating the need for manual logging.

ACTIVITIES

Participated in hackathons, utilizing coding skills to drive innovation, collaboration, and creative problem-solving under time pressure.

Solving LeetCode problems to enhance coding productivity, algorithmic thinking, and problem-solving skills.
